TODAY FOR TOMORROW

WELCOME HOME

# **Kömmerling 76 residential door Standard**

# COMING HOME STARTS AT THE FRONT DOOR

## Kömmerling 76 residential door Standard

A residential door from the Kömmerling 76 system is both protection and an eye-catcher. It is an expression of your individual taste and part of your living environment. At the same time, it offers you security and the good feeling of being completely safe at home. Discover the advantages of this system for inward and outward opening residential doors!

### SECURE

- High burglary protection up to resistance class RC 2 (MC 2)
- Special fittings can increase security even further
- Five-chamber design with steel reinforcement of maximum dimensions and welded corner connector for improved static properties
- Protection against driving rain through specially designed sealing blocks near the rebate
- Threshold connector for an accurate fit and sealing between the frame and threshold

### SUSTAINABLE

- Highly insulating residential door system made of PVC-U 76 mm installation depth
- Optimal protection against cold and heat
- Significant reduction of CO<sub>2</sub> emissions as well as high energy and cost savings
- High level of weather tightness thanks to double sealing for thresholds

### ADAPTABLE

- Use of special functional glazing or commercially available residential door panelling
- Wide range of designs: PVC-U white, laminates in woodgrains, uni or metallic colours, Kömmerling AcrylColor or in the surface technologie proCoverTec
- Inward or outward opening residential doors are available
- Maximum sash sizes of  
single-sash residential door: 1200 x 2400 mm  
double-sash residential door: 1000 x 2400 mm
